PROFESSIONAL SUMMARY

Detail-oriented Computer Science student targeting a Data Analyst role, with core expertise in Python, DBMS Principles, SQL, and data visualization. Proven ability to apply problem-solving, communication, and adaptability to build functional, user-centric technical solutions, including a full-stack learning management system. Eager to bring analytical thinking and continuous learning to deliver impactful data-driven solutions for dynamic IT teams.

EDUCATION

D. B. F. Dayanand College, Solapur – Solapur Apr 2026
Bachelor of Computer Science (BCS)
SGPA: 8.88

C. B. Khedgi College, Akkalkot - Akkalkot Apr 2023
Higher Secondary Certificate (HSC)
Percentage: 58.33%

TECHNICAL & Soft SKILLS

Python (Basics, OOP Concepts, File Handling), SQL, DBMS Fundamentals, MySQL, Microsoft Excel (VLOOKUP, Pivot Tables), Tableau (Basic Dashboards), Strong Communication Skills, Leadership, Adaptability & Quick Learning, Time Management, Problem-Solving Attitude

CERTIFICATIONS

- **Tata iQ – GenAI Powered Data Analytics Job Simulation** (Forage, Oct 2025)
  Explored AI-powered analytics, risk profiling, and predictive modeling.
  Credential ID: BPSxf78gS4xtG3A7v

- **Deloitte Australia – Technology Job Simulation** (Forage, Oct 2025)
  Developed proposals for dashboard creation and coding solutions.
  Credential ID: HxeyxCrMjueuJpcHL

- **Deloitte Australia – Data Analytics Job Simulation** (Forage, Aug 2025)
  Performed data analysis and prepared business insights dashboards.
  Credential ID: 4uS6qbyrZdR3G2LE2

PROJECTS & ACTIVITES

- **BharatLearn – The Learning Management System | [Live Link]** (Nov 2025 – Feb 2026)
  Full Stack Web Application | Tech Stack: Flask, MySQL
  - Built a full-stack Learning Management System with authentication, course enrollment, progress tracking, streak system, and admin analytics dashboard.
  - Designed relational database schema and implemented CRUD operations.
  - Applied Python programming and DBMS principles to design and implement the project's core backend logic, building a scalable, reliable data architecture that supported over 500 simulated user accounts during testing.
